But the swift consciousness of its impossibility was followed by a dull, bewildering torpor that tent her motionless, helplessly following the vesse, with straining eyes, as i" they could evoke some response from its decks. The news that 600 members of the National Editorial association will be present at the opening of the Printers' Home in this city on May 12, will be welcome to those interested in our city and its reputation acroad. We receive It as a special compliment that they will Sion here, and nowhere else on their way to the convention at San Francisco. The distinguished guests will no doubt receive the attention to which they are just y entitled. Incidentally we may remark that this visit affords fresh proof of the value of such an institution to this city. The preparations, already made for the 12th of May are such as to make sure that it will be a Cay long to be remembered in this city.

The assembling of the great industrial convention in St. Louis proves one taing. It proves that there are in this country a considerable number of people who are dissatistica with their condition and who believe that things they want are tept from them, not birough any ault or ack of effort on their part, out on account of the action of certain laws which they are anxious to have change.
